

Clinic Depart Process

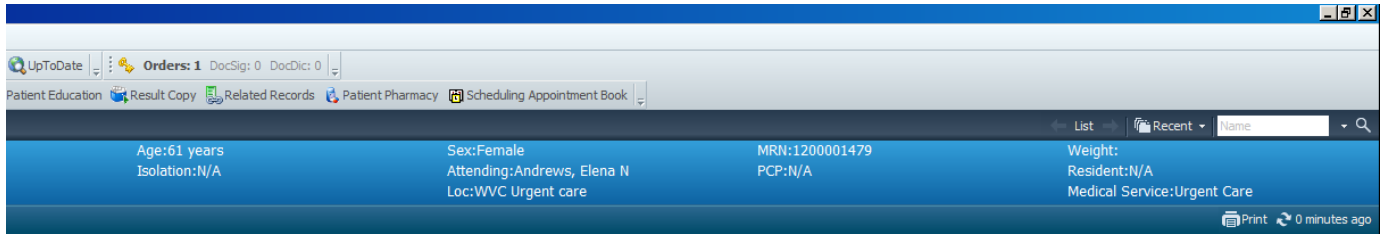

1. Review the chart before or during patient intake
2. Enter and/or update problems/diagnoses, allergies
 - a. You can add some historical elements if you have time. These can be done outside the room.
 - b. Remember to document **no known allergies** (usually pre-selected) and no active meds (located in upper left corner of document meds by history window) if the patient is not on any medications (screen shots are provided in this communication).

D/A	Substance	Category	Reactions	Seve...	Type	C.	Est. Onset	Reaction S...
	NKA	Drug			Allergy			Active

Classification	Name of Problem	Confirmation	Onset Date	Life Cycle St...	Course	Vocabulary	Code
Medical	Well child	Confirmed		Active		SNOMED CT	165767019

- c. You can also add **Well adult** or **Well Child** to the **problem list** to insure something is there
 - d. Document smoking status, if not done on intake
3. Open your Add Orders window and engage the patient
4. Order any lab, radiology, consults, point of care, follow up and billing prior to ending the encounter with the patient.
5. Complete and sign your orders
 - a. If you create favorites for your routine visits, this should be a quick process

6. Select the Depart Icon next to the file bin and review the encounter summary, selecting any patient education materials prior to depart
 - a. Sign off the encounter summary (**steps 6-8 are not required to exit the patient**)
