

Placing Preop Orders

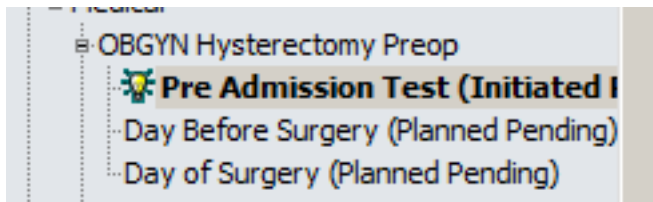

****These orders are designed for outpatient and am admit surgeries****
****For inpatients and ED patients use SURG Pre-op from Inpatient/ED****

Make sure you are placing these orders on the correct pre-admit encounter

The preop powerplans are multiphase plans, which means that each section can be initiated/acted on at a different time.

Click on each phase to select the orders in each section.

Sign the orders when you have completed all of the phases.

The Pre Admission Test phase will initiate automatically. DO NOT initiate the other phases. They will be initiated by Day Surgery at the appropriate time.

If not used, Pre-op orders will remain active and available for use for 6 months to allow for future cases and rescheduling. After 6 months, they will automatically be discontinued by the system.
